Sharing Shared Services — part of the PostalPEOPLE strategy

Employee Resource Management Vice President Debbie Jackson recently talked to Human Resource managers from around the country in Greensboro, NC, about how the move to Shared Services will impact their districts.

The new Shared Services Center in Greensboro is part of the overall *PostalPEOPLE* strategy — the ultimate in employee self-service — making it quick, easy and convenient to access personal information 24/7. Employees in 28 districts use the center to get help with retirement and separation, compensation and benefit changes as well as executive and administrative schedule selection.

By Sept. 1, all 80 districts will be on the new system.

BSN reorganizes to better serve customers

Customer Service VP Susan Plonkey meets with former Mailers Technical Advisory Committee (MTAC) Industry Chairperson Bob O'Brien after explaining Business Service Network changes at a recent MTAC meeting.

The Postal Service's Business Service Network (BSN) — the team that supports our largest mailers — is reorganizing to better serve our customers.

National accounts, previously supported by district BSN staff, will now be served by area BSN representatives.

District staff will continue to serve Premier accounts. Customer Service Vice President Susan Plonkey says the realignment positions the BSN as a true service partner to customers with renewed focus on problem identification and resolution.

A new BSN National Service Improvement Team is also being created, with both area and HQ staff to be in place in early April. The team will concentrate on industry trends and issues resolution.

Customers have been told of the change through the Mailers Technical Advisory Committee, individual letters and the USPS *Memo to Mailers* magazine.

A new do for Wanda

When Owenton, KY, Rural Carrier Wanda New decided to get her first real haircut in more than 40 years and donate her ponytail to Locks of Love — an organization that provides wigs to children suffering from diseases such as alopecia — she had no idea it would get her on national TV in front of millions of viewers.

New was just one of thousands who participated in numerous Locks of Love events around the country that day, but because her hair was so long — 55 inches — and it hadn't been cut in more than 40 years, *The Today Show* featured her.

"It was an awesome experience to see how they produce live TV shows," she says. But the pace of the big city was much different than in Owenton. "It was a culture shock."

The *Today Show* provided a team of stylists who had New looking "New York fabulous" by the end of show.

Stamps honor the men who saved the world from polio

Owenton, KY, Rural Carrier Wanda New donating hair to Locks of Love on *The Today Show*.

Through the early 1950s, polio outbreaks caused such panic and widespread concern that parents kept their children away from school and other public facilities. Finding a polio vaccine became the work of Dr. Jonas Salk at the University of Pittsburgh's

Medical School. When the announcement was made on April 12, 1955, that Salk had developed a vaccine, he was hailed as a national hero.

Later, at the Cincinnati Children's Hospital Medical Center, Dr. Albert Sabin created another polio vaccine that used a live, but weakened, virus. Because it was easier to administer and reduced the spread of polio, Sabin's vaccine became the standard treatment for years.

Stamps honoring both men were issued recently and the Postal Service held ceremonies in the cities where the two conducted research — Pittsburgh and Cincinnati.

Both stamps are on sale nationwide.

New Safety and Environmental Performance Management office

A new Safety and Environmental Performance Management function has been created at Headquarters to manage all aspects of safety, health and environmental programs.

Chief Human Resources Officer Tony Vegliante said the new entity will oversee employee and customer safety and health issues, and ensure regulatory compliance, operational efficiency and cost effectiveness.

Vegliante said he expects the change to provide clearer, standardized and consistent direction and information to managers, employees and external stakeholders.

The new office combines the existing Safety Performance Management, Environmental Management Policy, the Ergonomic Risk Reduction Program and Occupational Safety and Health Administration Coordination Program into a single entity.

"Combining all of our safety, health and environmental programs under one function will further strengthen our safety and environmental efforts and help us make the Postal Service an even better place to work."

USPS stamp program earns awards

Cloudscapes is one of three USPS stamp designs to earn a gold medal at Creativity 35.

Pacific Coral Reef designs received top honors at Creativity 35 — an annual competition honoring bright ideas in graphic design.

U.S. Olympic athletes weren't the only ones winning gold medals this winter! Three stamps from the Postal Service's stamp program received some gold-medal recognition for artistic design and excellence. The *Cloudscapes*, *Lewis and Clark Bicentennial* and

In all, USPS earned 20 prizes from a variety of top graphic design publications and organizations. Other stamp designs earning Merit Awards and Awards of Distinction were *Love Bouquet*, *Isamu Noguchi*, *Snowy Egret*, *Reptiles and Amphibians*, *Love: Candy Hearts*, *Art of the American Indian*, *Modern American Architecture*, *Marian Anderson* and *Advances in American Aviation*. These awards were given by publications and organizations such as *Communications Arts* magazine, *PRINT* magazine, American Institute of Graphic Arts, as well as Creativity 35.

USA Philatelic Fall 2004 and Spring 2005 catalogs also earned American Graphic Design Merit Awards.

New Safety Depends on Me campaign

"I Pledge Safety" is the newest Safety Depends on Me campaign, with kits already being distributed.

The kit — to be followed by six more — features posters and tools for employees to make personal commitments to work safely.

Safety Performance Management is providing the materials, which include a cover letter, DVD,

"I Pledge Safety" posters, and markers for employees to sign their personal safety pledge on the posters. The kit also has ideas for managers and supervisors to work with local safety and health committees and to lead pledge-signing events at their facilities.

By signing pledge posters, employees and work teams will show their commitment to practice safe behaviors both at home and at work — and prove that safety depends on all of us.

Trade show propels central PA postmasters into national spotlight

Heather Dockey is the Picture Rocks, PA, postmaster and the central PA district customer service ambassador. She takes both roles seriously.

Imagine then the opportunity the Williamsport Home Show presented to Dockey;

"We educated thousands about alternate access, Click-N-Ship, Carrier Pickup and various products and services available round the clock on USPS.com," said Dockey.

The team also spoke to more than 130 exhibitors about what the Postal Service offers.

The trio of Dockey, Crawford and Crawford were responsible for more than 3,000 Business Connect leads. Enough to make them the top three performers in the nation and vault the central PA district up to 13th in the country.

Domestic Mail

DMM REVISION

New Marking Requirement for Bound Printed Matter Machinable Parcels

Effective July 6, 2006, mailers must place a new marking on Bound Printed Matter (BPM) machinable parcels consisting of multiple pieces secured with transparent shrinkwrap. The new marking will enable our automated equipment to recognize that these BPM machinable parcels are intended for a single address. The marking does not apply to BPM flats or irregular parcels.

Under the new standards in 402.2.0 and 708.7.0 of the *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM®)*, when a BPM machinable parcel consists of multiple pieces for a single address secured with transparent shrinkwrap, mailers must label the parcel using one of the following options:

- A firm optional endorsement line (OEL), followed by the 5-digit destination ZIP Code™ of the parcel.
- A blue, pressure-sensitive, barcoded Label F on the address side of the parcel.

The new firm OEL or pressure-sensitive Label F requirement applies only to BPM machinable parcels consisting of multiple pieces secured with transparent shrinkwrap. A BPM parcel prepared with a cardboard box, for example, does not require a firm OEL or Label F.

The effective date of these changes is July 6, 2006, but mailers are encouraged to use the new marking as soon as possible.

Mailers must label the parcel using one of the following options:

- a. A firm optional endorsement line under 708.7.0, followed by the 5-digit destination ZIP Code of the parcel.

Sack Preparation Changes for Periodicals Mail

Effective May 11, 2006, we are adopting new mailing standards for Periodicals mail prepared in sacks. The standards include two new types of sacks — a 3-digit carrier routes sack and a merged 3-digit sack — and a new minimum of 24 pieces for most other sacks. We published this revision in the January 19, 2006, *Postal Bulletin* 22172, but gave the wrong sack labeling information in 705.10.1.4h of the *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)*. We provide the corrected line 2 labeling information below. These corrected standards are also effective on May 11, 2006.

NOTICE

Update to Periodicals Zone Analysis Program

The Postal Service™ has updated the reporting requirements for the Zone Analysis Program (ZAP) by clarifying that Periodicals mailers may show the ZAP software certification information in the heading of the USPS Qualification Report or standardized documentation rather than on PS Form 3541, *Postage Statement — Periodicals — One Issue or One Edition*. The ZAP software certification information includes the ZAP option and the effective date of the USPS Zone Chart Matrix used by the Periodicals mailer. The previous format for listing the applicable ZAP information on PS Form 3541 is also acceptable.

We have incorporated this update on page 16 of the ZAP Technical Guide, which is available on the RIBBS Web site at <http://ribbs.usps.gov/index.html>; under "RIBBS Links," click on ZAP, then ZAP Publications, then ZAP Technical Guide 2006–2007.PDF.

The Postal Service™ developed ZAP to assist publishers who use PS Form 3541 to allocate Periodicals copies to the correct zone based upon the most up-to-date USPS® zone information. ZAP is also intended to simplify postage verification procedures by Postal Service employees. ZAP helps allow the Postal Service to ensure that the zones claimed and the postage paid by Periodicals publishers

using PS Form 3541 are accurate and reflect the most current zone information available from the Postal Service.

ZAP-approved software accurately assigns zones using the USPS Zone Chart Matrix (national electronic zone charts) and is updated at least once each calendar year. Several different ZAP options are available depending upon the size of mailings and the mailing practices of the publisher. Periodicals publishers can request ZAP approval for their software by following the instructions in the ZAP Technical Guide.

Periodicals publishers can also complete the Zone Analysis Program Order Form located on the Rapid Information Bulletin Board System (RIBBS) Web site at <http://ribbs.usps.gov/index.html>; under "RIBBS Links," click on ZAP, then ZAP Order Form.

For more information on ZAP, see the ZAP Technical Guide and the article titled "Handbook DM-109 Revision: New Process for Annual Zone Analysis for Periodicals" in *Postal Bulletin* 22150 (3-17-05, pages 7–9).

862.22 Printing and Imaging

This section establishes policy and requirements for acquiring and supporting print devices in the Postal Service.

862.221 Policy

The Postal Service is committed to reducing printing costs by acquiring, deploying, and managing its print devices in accordance with the following objectives:

- Reducing the number of available print device vendors and models.
- Limiting support of print devices to those listed on the following Web pages (hereafter called supported devices).

ACE-Supported Printers: Go to <http://it.usps.gov>. A longer URL will appear; add the number 930 at the end.

Windows-Based Printers: Go to <http://it.usps.gov>. A longer URL will appear; add the number 341 at the end.

- Encouraging the use of centrally managed network print devices and multifunction peripheral (MFP)

devices where possible. See MFP Guidelines and Criteria.

Go to <http://it.usps.gov>. A longer URL will appear; add the number 1038 at the end.

- Reducing the number of stand-alone personal desktop print devices.

This policy applies to all Postal Service organizations, employees, and contractors, and any business partners who are provided with Postal Service-owned printing equipment.

862.222 PRIME (PRinting and IMaging Environment) Program

PRIME is the nationwide Postal Service program that standardizes printing capabilities and resources so both are more practical and economically efficient. Through the ADEPT II contract, available online at <http://wadchq2ksts01.usps.gov>; click on *Adept II*, PRIME provides Postal Service personnel with access to the following:

- Printing devices (hardware) for 4 years.
- Consumables, including toner, staples, and imaging drums.

862.223 Roles and Responsibilities

- Information Technology

The Information Technology organization is responsible for the following:

- Establishing and enforcing standards for the acquisition and use of print devices.
- Providing program management for PRIME.
- Providing IT Help Desk (IT/CHD) support for supported devices as stated in section 862.224.
- Serving as the approval authority for:
 - Adding or deleting print devices to the ADEPT II or MFP contract.
 - Acquiring "Off Catalog" print devices.

b. Engineering

The Engineering organization is responsible for the following:

- (1) Defining requirements for all print devices purchased and deployed for use in Engineering-managed programs.
- (2) Considering economies available through the PRIME program via ADEPT II and using these print devices whenever possible.
- (3) Following Engineering's approval process for acquiring print devices used in Engineering-managed programs.
- (4) Providing support for print devices deployed as part of Engineering-managed programs.
- (5) Following Engineering Configuration Management and Engineering Change Board (ECB) processes for print devices deployed as part of Engineering-managed systems.

c. All Functional Organizations

Application program sponsors are responsible for the following:

- (1) Complying with print device purchasing policies.
- (2) Following IT Change/Configuration Management Support processes for deploying print devices. Go to <http://cto.usps.gov>. A longer URL will appear; add the number 694 at the end.
- (3) Ensuring that all print devices are registered in the Postal Service Asset Inventory Management System. See MI AS-850-2002-13.

862.224 Customer Support

The IT Corporate Help Desk (IT/CHD) provides the following for supported devices:

Supported Devices	IT/CHD Provided Support
ACE-Supported Printers: A list of these can be found by going to http://cto.usps.gov . A longer URL will appear; add the number 930 at the end.	Driver, application, and hardware troubleshooting.
Windows-Based Printers: A list of these can be found by going to http://it.usps.gov . A longer URL will appear; add the number 341 at the end.	Driver support if the drivers are posted on the noted Web page or if the driver is part of the ACE image. (Local IT is responsible for hardware support.)

862.225 Network Print Devices

a. General

Network print devices will be:

- (1) Provided via ADEPT II.

- (2) Replaced by IT as needed or as they become obsolete.

- (3) Used on a workstation-to-print device ratio of approximately 9:1, when possible.

b. Acquisition of Additional or Expansion Print Devices

The acquisition of additional or expansion devices must be:

- (1) Approved by the ACE Program Management Office (see Exhibit 862, Print Device Contact Information).
- (2) Included on the list of ACE-supported printers. Go to <http://cto.usps.gov>. A longer URL will appear; add the number 930 at the end.
- (3) Funded locally for both acquisition and ongoing support if not provided through a centrally funded program. (Acquire through the eBay process (<http://ebuy>) from the ADEPT II contract. Go to <http://wadchq2ksts01.usps.gov> and click on *Adept II*.)

862.226 Personal Desktop Print Devices

Personal desktop print devices will be:

- a. Supported by IT/CHD, local IT, or both, as long as they are supported devices.
- b. Normally used at non-LAN sites and LAN sites without a file and print server.
- c. Connected to the network where possible.
- d. Permitted for:
 - (1) Postal Career Executive Service (PCES)-level management.
 - (2) Users who routinely work with sensitive and secure data only with the written approval of the local PCES manager.

Note: As multifunction peripherals (MFPs) and other print devices with private print features are deployed, the need for personal desktop print devices for non-PCES level management will be reduced and eventually eliminated.

862.227 Multifunction Peripherals

Multifunction peripherals (MFPs) will be supported by IT as long as they remain on the current list of ACE-supported printers. Go to <http://cto.usps.gov>. A longer URL will appear; add the number 930 at the end. MFPs must be:

- a. ACE-compliant.

- b. Available through the PRIME program or acquired locally through the eBay process (<http://ebuy>) and from the ADEPT II or MFP contracts. Go to <http://wadchq2ksts01.usps.gov> and click on *Adept II*.

862.228 Special-Purpose Print Devices

Special-purpose print devices will not be available through PRIME. Special-purpose print devices must be:

- a. ACE-compliant.
- b. Approved by the ACE Program Management Office (see Exhibit 862, Print Device Contact Information).
- c. Supported for special programs by a service-level agreement as long as they remain on the current list of ACE-supported printers. Go to <http://cto.usps.gov>. A longer URL will appear; add the number 930 at the end.
- d. Funded by local purchases or by the program sponsor through the eBay process (<http://ebuy>) from the ADEPT II contract. Go to <http://wadchq2ksts01.usps.gov> and click on *Adept II*.

862.229 Exceptions

GLOBAL EXPRESS GUARANTEED SERVICE

Updated List of GXG Retail Locations

Starting on page 17 is a complete, updated ZIP Code™ list of all retail locations — a total of approximately 8,600 locations — where Global Express Guaranteed® (GXG®) service is available to customers effective March 30, 2006. Use this list in place of the GXG retail site list published in *Postal Bulletin* 22164 (9-29-05) (that list started on

page 77). (The Postal Service™ may change the status of sites based on area and district identification of customer demand and potential growth of expedited international shipping.)

See also the following GXG Acceptance Matrix below, which shows employees how to process GXG shipments.

Many of the new GXG retail offices were identified as high-potential GXG offices based on demographic research. Other new GXG retail offices were added when districts identified facilities that serve colleges and universities (which can have high demand for GXG services) and added GXG retail offices at those facilities. In the future, districts will continue to identify high-potential GXG offices and integrate them into the GXG facilities database.

New GXG offices are scheduled to receive a GXG Supply Starter Kit during the week of March 27, 2006. GXG retail transaction standard operating procedures (SOPs) are available on the Delivery Web site:

- Go to <http://blue.usps.gov/delivery>.
- Under "Customer Service Operations," click on *Retail Operations*.

- Under “Significant Links,” click on *Retail SOPs*.
- Under “International Products Standard Operating Procedures,” click on *Retail*.

(The direct URL for the Deliver Web site’s International Products SOPs is http://blue.usps.gov/delivery/retail/sop/international/top_page.htm.)

GXG retail locations may order PS Form 6182, *Commercial Invoice* — the customs documentation specifically for GXG — from the Material Distribution Center (MDC) and use touch tone order entry (TTOE): Call 800-332-0317, option 2.

Note: You must be registered to use TTOE. To register, call 800-332-0317, option 1, extension 2925, and follow the prompts to leave a message. (Wait 48 hours after registering before placing your first order.)

Overseas Military Mail

Mail addressed to military post offices overseas is subject to certain conditions or restrictions of mailing regarding content, preparation, and handling. The APO/FPO table below outlines these conditions by APO/FPO ZIP Codes™ through the use of footnoted mailing restrictions codes (see the Restrictions page following the table).

Acceptance clerks should use the table with the integrated retail terminal (IRT) or POS ONE terminal to determine which APO/FPO ZIP Codes are active and

which conditions of mailing apply. **Acceptance clerks may contact the Military Postal Service Agency with any questions regarding APO/FPO ZIP Codes, toll free, at 800-810-6098, Monday–Friday, 0730–1630 ET.**

For Express Mail Military Service (EMMS) availability, all acceptance clerks must refer to the local hardcopy EMMS directory.

*FIELD INFORMATION KIT***International Mail — Scanning Inbound Parcels at Delivery**

This field information kit is designed to help reinforce how important it is for Postal Service™ employees to properly scan all inbound international parcels at delivery. As of January 1, 2006, the Postal Service began assuming liability for the loss, damage, or rifling of all parcel items sent to the United States from a foreign destination. Properly scanning all inbound international parcels at delivery helps provide customers with the service they expect and at the same time minimize the liability of the Postal Service. The Postal Service implemented this change to comply with a new requirement established by the Universal Postal Union (UPU).

The information in this kit helps to reinforce the procedures for properly scanning all inbound international parcels at delivery. This kit contains the following materials:

- Briefing Article.
- Sample Labels.
- Frequently Asked Questions.
- Service Talk for Retail and Delivery Employees.

Briefing Article*Scanning Inbound International Parcels*

On January 1, 2006, the Postal Service assumed liability for the loss, damage, or rifling of all parcel items sent to the United States from a foreign destination. The Postal Service implemented this change to comply with a new requirement established by the UPU. According to the UPU decision, liability applies to all items defined as a parcel, whether or not the item includes a special service. Coverage is limited to the actual value of the contents or the maximum indemnity based on the weight of the article, whichever is less.

In an effort to provide our customers with the service they expect and at the same time minimize the liability of the Postal Service, postmasters and managers should instruct delivery and other field employees of the importance of scanning all inbound international parcels. To assist postmasters and managers in talking with their delivery and field personnel, the following information details the process for properly identifying and scanning inbound international parcels at delivery.

Scanning and Signature-Capture Process

When an employee scans or enters an inbound international parcel at the point of delivery, the Mobile Data

Collection Device (MDCD) scanner either recognizes the barcode or label ID that was entered or provides a prompt to the employee asking if the mailpiece is one of the following:

1. International.
2. COD.
3. Neither.

If the employee enters “3” for “Neither” — which is an incorrect procedure — the scan will not be accepted. When the employee enters “1” for “International” — which is the correct procedure — the scan will be accepted. If the employee then chooses “Delivered” as the Confirmation Event, the scanner activates additional prompts that guide the employee in completing the necessary signature-capture process. Employees must follow the signature-capture requirements for inbound express, registered, recorded delivery, and insured mail items received from foreign countries.

All inbound international parcels and express, registered, recorded delivery, and insured mail items that require scanning and signature capture at delivery contain either of the following designations:

- A barcode that starts with a specific alpha character — either C, R, A, V, or E.
- A manual endorsement that starts with a specific alpha character — either C, R, A, V, or E.

It is suggested that employees always look for these designations on inbound international parcels to help ensure they perform the required scanning and signature-capture process.

Label Designations

Listed below are the different types of inbound international items that require either a scan of the barcode or a keyed entry of the label ID at the time of delivery. Also noted are the different types of designations that appear on each inbound international parcel label.

- Parcels have a “C” prefix, such as “CP123456789BK.”
- Insured parcels may have a barcode or some other stamped or handwritten number that starts with a “V” prefix, such as “V123456789KY” or “VV123456789KY.” Most insured parcels also have a “C”-prefix barcoded label. If a parcel contains two codes, employees are to scan both barcodes at the time of delivery.

Field Information Kit

International Mail — Scanning Inbound Parcels at Delivery

- Express mail items have a barcode or some other stamped or handwritten number that starts with an “E” prefix, such as “EP006533895IT.”
- Registered mail items may have a barcode or some other stamped or handwritten number that starts with an “R” prefix, such as “R123456789IL” or “RR123456789IL.”
- Recorded delivery items may have a barcode or some other stamped or handwritten number that starts with an “A” prefix, such as “A123” or “AA123.”

Parcels With Multiple Barcodes

For any inbound international parcel that bears more than one barcode, the employee must scan all of the barcodes at the time of delivery. If a barcode is unreadable, the employee must enter the label's letters and numbers. Some possible multiple barcode combinations are noted below:

- Parcel “C” and insured “V.”
- Express mail “E” and customs form “C.”

Scanner Malfunction or Scanner Unavailable

If a scanner isn't available at the time of delivery or if there is a scanner malfunction, the delivery employee must record each label's letters and numbers, the mailer's name, and the date, time, and ZIP Code™ of delivery on the front of PS Form 3849, *Delivery Notice/Reminder/Receipt*, obtain the recipient's signature, and deliver the item. When a working scanner becomes available, follow standard procedures for Manual Input (Option 5) (i.e., enter the information from the front of PS Form 3849) and then process the PS Form 3849 following the signature-capture process.

Sample Labels

The appearance of the labels on inbound international parcels can differ greatly based on the country of origin. To assist employees in properly identifying inbound international mail that requires scanning and signature capture, the following sample labels are provided as examples of what to look for.

Frequently Asked Questions

1. *The look of the labels on inbound international parcels can differ greatly based on the country of origin, so how will I know when I need to scan an item?*

All inbound international parcels require either a scan or a manual entry at delivery based on which one of the following indicators appears on the item:

- A barcode that starts with a specific alpha character — either C, R, A, V, or E.
- A manual endorsement that starts with a specific alpha character — either C, R, A, V, or E.

You should always look for these designations on inbound international parcels to help ensure you perform the required scanning and signature-capture process.

2. *What indicators or markings should I look for on inbound international parcels?*

Inbound international parcels display a unique number that begins with the alpha character of either C, R, A, V, or E. The alpha character represents the following types of inbound international mail:

- C — parcel (e.g., “CP123456789BK”).

- R — registered mail (e.g., “R123456789L” or “RR123456789L”).
- A — recorded delivery (e.g., “A123” or “AA123”).
- V — insured parcel (e.g., “V123456789KY” or “VV123456789KY”).
- E — express mail (e.g., “EP006533895IT”).

3. *Is it possible for an inbound international parcel to contain more than one barcode?*

Yes, an inbound international parcel could contain more than one barcode. Here are some possible multiple barcode combinations you might see:

- Parcel “C” and insured “V.”
- Express mail “E” and customs form “C.”

4. *Which barcode do I scan when an inbound international parcel contains more than one barcode?*

For any inbound international parcel that bears more than one barcode, you must scan all of the barcodes at the time of delivery. If a barcode is unreadable, you must enter the barcode’s letters and numbers into the scanner.

5. *What should I do when a label won’t scan after I’ve tried to scan it several times and I can’t input the number?*

Write each label’s letters and numbers, the mailer’s name, and the date, time, and ZIP Code of delivery on the front of PS Form 3849, obtain the recipient’s signature, and deliver the item. Upon returning to the office, try entering the article’s letters and numbers into a different handheld MDCC scanner in Manual Input (Option 5) mode. Notify your supervisor if you are unable to enter this information into a scanner.

6. *What should I do if my scanner fails to work while I’m out on my route?*

Record all information on PS Form 3849 for Manual Input as needed for each delivery. Record all information on the parcel for attempted deliveries. Upon return to your unit, notify your supervisor of the scanner malfunction to have it replaced. When a working scanner becomes available, follow standard procedures for Manual Input (Option 5) (i.e., enter the information from the front of PS Form 3849) and then process the PS Form 3849 following the signature-capture process.

Field Information Kit**International Mail — Scanning Inbound Parcels at Delivery****7. How can I check that a parcel scan was actually entered into my handheld scanner?**

Go to MAIN OPTIONS and choose number 2, REVIEW ENTRIES, and follow the prompts. You will see a list of all items scanned. If the item you were unsure of does not appear on the list, choose ESCAPE. Go back to MAIN OPTIONS and select number 1, SCAN BAR CODES. Rescan the item.

Service Talk for Retail and Delivery Employees*Scanning Inbound International Parcels at Delivery*

It is essential that each of us understands the importance of properly scanning inbound international parcels at delivery. This is critical because as of January 1, 2006, the Postal Service began assuming liability for the loss, damage, or rifling of all parcel items sent to the United States from a foreign destination. This new policy was implemented to comply with a requirement established by the UPU.

Another very important reason for proper scanning is our customers. We need to provide them with the service they expect and deserve.

The proper scanning of all inbound international parcels takes commitment from each one of us. So here's what you need to know:

- When you scan or enter an inbound international parcel at the point of delivery, the MDCD scanner either recognizes the barcode or label ID that was entered or provides a prompt to you asking if the mailpiece is one of the following:
 1. International.
 2. COD.
 3. Neither.

- If you enter "3" for "Neither" — which is an incorrect procedure — the scan will not be accepted.
- When you enter "1" for "International" — which is the correct procedure — the scan will be accepted.
- If you then choose "Delivered" as the Confirmation Event, the scanner activates additional prompts that guide you in completing the necessary signature-capture process.
- You must follow the signature-capture requirements for inbound express, registered, recorded delivery, and insured mail items received from foreign countries.

All inbound international parcels and express, registered, recorded delivery, and insured mail items that require scanning and signature capture at delivery contain either of the following designations:

- A barcode that starts with a specific alpha character — either C, R, A, V, or E.
- A manual endorsement that starts with a specific alpha character — either C, R, A, V, or E.

Always look for the C-R-A-V-E designation on inbound international parcels to help ensure you perform the required scanning and signature-capture process.

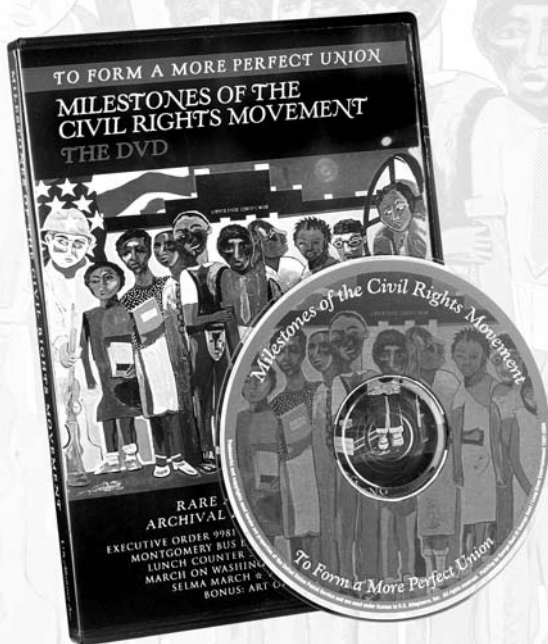

Be aware that you play a role in helping protect the Postal Service from liability for inbound international parcels that are not properly scanned. And always keep in mind the needs and expectations of our customers. Then, do your part — one scan at a time.

Pictorial Postmarks Announcement

As a community service, the Postal Service™ offers pictorial postmarks to commemorate local events celebrated in communities throughout the nation. A list of events for which pictorial postmarks are authorized appears below. If available, the sponsor of the pictorial postmark appears in italics under the date. Also provided, as space permits, are illustrations of those postmarks that were reproducible and available at press time.

People attending these local events may obtain the postmark in person at the temporary Post Office™ station established there. Those who cannot attend the event, but who wish to obtain the postmark, may submit a mail order request. Pictorial postmarks are available only for the dates indicated, and *requests must be postmarked no later than 30 days following the requested pictorial postmark date.*

All requests must include a stamped envelope or postcard bearing at least the minimum First-Class Mail® postage. Items submitted for postmark may not include

postage issued after the date of the requested postmark. Such items will be returned unserved.

Customers wishing to obtain a postmark should affix stamps to any envelope or postcard of their choice, address the envelope or postcard to themselves or others, insert a card of postcard thickness in envelopes for sturdiness, and tuck in the flap. Place the envelope or postcard in a larger envelope and address it to: PICTORIAL POSTMARKS, followed by the NAME OF THE STATION, ADDRESS, CITY, STATE, ZIP+4® CODE, exactly as listed below (using all capitals and no punctuation, except the hyphen in the ZIP+4 code).

Customers can also send stamped envelopes and postcards without addresses for postmark, as long as they supply a larger envelope with adequate postage and their return address. After applying the pictorial postmark, the Postal Service returns the items (with or without addresses) under addressed protective cover.

Used Toner Cartridge Return Agreements Using Business Reply Mail Labels Benefit Postal Service

In an effort to generate revenue for the Postal Service™, the Office Products & Utilities Category Management Center (OPU-CMC) has established agreements with the following three suppliers to accept used toner cartridges returned for recycling via Postal Service Business Reply Mail (BRM) labels. The OPU-CMC Web site, http://blue.usps.gov/purchase/supplies/sup_opu_home2.htm, has links available to download BRM labels for the return of specific used cartridges. The links also are provided below.

1. Hewlett-Packard (HP) Toner: http://blue.usps.gov/purchase/supplies/sup_opu_mrlabel.htm
2. Ricoh (Copier Toner): http://blue.usps.gov/purchase/_doc/sup_copylabel.doc
3. Lexmark Toner: http://www.lexmark.com/vgn/images/portal/elpaso_79907.pdf

Unfortunately, toner manufacturers include return labels in their packaging that use competitor delivery services such as United Parcel Service (UPS), and neither the

Postal Service nor its suppliers can control this practice. However, Postal Service employees do not have to use those pre-packaged labels. Whenever possible, employees should use the labels from the links provided to return used toner cartridges.

BRM labels have been established for the most popular toner cartridges used by the Postal Service. If the toner cartridge to be returned is not one that has a BRM label, the used cartridges — regardless of brand — can be given to the Boise Cascade Office Products (BCOP) Federal representative delivering an office supply order at the facility. Moreover, if there are large quantities of used toner cartridges that need to be returned, a special pick-up request may be made through BCOP Federal Customer Service at 800-229-USPS (8777). BCOP Federal is the national supplier of office products for the Postal Service.

NOTICE

eSPIN — Enhanced Spare Parts Initiative

eSPIN (Enhanced Spare Parts Initiative) is a commercial-off-the-shelf (COTS) system that will not only plan, forecast, and optimize inventory for item managers centrally, but also for maintenance field locations through the Maintenance Activity Reporting and Scheduling System (eMARS). This system will pull data from eMARS and the Material Distribution and Inventory Management System (MDIMS) to make new buy, repair, and transfer recommendations utilizing inventory at the Material Distribution Center (MDC) and field locations. Recommended orders will be generated in eSPIN and passed into MDIMS and eMARS. eMARS users will continue to approve the order recommendations in eMARS as they do today.

The eSPIN system will track new buy, transfer, and repair lead time for parts and supplies and recommend the most advantageous sources of supply. Key benefits of the system include the following:

- It will automatically recommend redistribution of “on-hand good” inventory versus recommending new purchases. Inventory transferred between locations will trigger journal voucher transactions to credit locations that share their excess inventory and charge locations that receive the inventory.

- eMARS will receive order and stocking recommendations from eSPIN based on forecast planning rather than re-order point calculations used today. Field locations will monitor forecast accuracies for their offices. They will also be able to request a forecast change if research shows a need.
- eSPIN will utilize total inventory (MDC plus field) when forecasting new buy recommendations to item managers. With this calculation, it should reduce the number of new buys.
- As machines are taken out of service or redistributed, the forecast for parts will adjust automatically as machine population is updated in eMARS at individual locations.
- Field locations will have total view of inventory at the MDC and field levels.

eSPIN was implemented for the item managers (MDC) in December 2005. eSPIN will begin making recommendations to eMARS on April 3, 2006.
