Cover Story

Prevent Heat Illnesses. Know the Signs and Act.

Summertime can put employees at risk for heat illnesses. High temperatures and humidity, direct sun or heat, limited air movement, physical exertion, poor physical condition, and some medicines are contributing factors to heat illnesses.

When the body is unable to cool itself by sweating, heat-induced illnesses such as heat stress, heat cramps, heat exhaustion, and heat stroke can quickly worsen and eventually cause death. Symptoms range from mild and easily correctable to severe and life-threatening, if not immediately addressed.

Many heat-related deaths are preventable when employees recognize the symptoms and know what to do. Watch out for these signs:

- Hot, dry skin or profuse sweating;
- Headaches;
- Confusion or dizziness;
- Nausea or vomiting;
- Rapid pulse;
- Muscle cramps;
- Weakness or fatigue; and
- Rashes.

If employees experience signs of heat-related illnesses, they must seek immediate medical assistance by calling 911. Employees can also be proactive and beat the heat with these tips:

1. **Hydrate before, during, and after work.** Prevention is important — drink at least 8 ounces of water every 20 minutes.

2. **Dress appropriately for the weather.** On warm days, wear light-colored, loose-fitting, and breathable clothing to keep your body temperature down.

3. **Use the shade to stay cool.** When possible, use shaded areas to stay out of direct sunlight.

Employees who experience difficulty breathing or discomfort as a result of the heat while wearing a face covering should remove the covering until the discomfort ceases.

However, if the employee decides to remove his or her face covering, they must practice social distancing when they come into contact with others, and sneeze or cough into their elbow or a tissue.

DMM Revision: Flats Sequencing System Scheme Preparation Changes

Effective September 8, 2020, the Postal Service™ will revise *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®), in various sections to reflect a change in the type of mailpieces that qualify for Flats Sequencing System (FSS) Scheme preparation. Mailers may optionally use the FSS Scheme preparation beginning August 1, 2020. However, mandatory compliance is required by January 1, 2021.

The Postal Service is updating FSS Scheme preparation for USPS Marketing Mail®, Bound Printed Matter, and Periodicals flat-sized mailpieces. This change clarifies which mailpieces qualify for FSS, the allowable exceptions to FSS Scheme preparation, and other optional FSS Scheme preparation.

Additionally, this change allows mailers to provide the Postal Service with mailings that are prepared in a manner that is better aligned with mail processing operations.

Although the Postal Service will not publish the following revisions in the DMM until September 8, 2020, the standards are effective August 1, 2020.

14.1	General				

[Revise the text of 14.1 to read as follows:]

14.1.1 Eligibility

The following standards apply:

- Except as provided in 14.1.2 and 14.1.3, all USPS Marketing Mail, Periodicals, and Bound Printed Matter (BPM) (automation, nonautomation, and carrier route) flat-size mailpieces that meet the physical standards for a flat-sized piece in 201 are required to be sorted to eligible FSS schemes under Labeling List L006, column B.

- Mailings that include 10 or more pieces of USPS Marketing Mail flats, 6 or more pieces of Periodicals flats, or 10 or more pieces (or 10 or more pounds) of BPM flats to an FSS scheme must be separated or pooled into FSS scheme bundles.
- The Postal Service recommends the use of authorized flat trays in lieu of sacks for FSS bundles.
- All eligible pieces remaining from the FSS scheme sort must be separated or pooled into FSS facility schemes under Labeling List L006, column C, and properly bundled and placed on or in pallets, trays, sacks, or approved alternate containers, for FSS scheme ZIP Code combinations within the same facility.
- Mailpieces that meet the eligibility standards for 5-digit or 3-digit automation, 5-digit or 3-digit nonautomation, carrier route (except USPS Marketing Mail saturation) or presort will continue to be eligible for those piece prices when prepared in accordance with the FSS preparations standards.

14.1.2 FSS Exceptions

The following pieces must not be sorted to FSS schemes and must be sorted to the applicable carrier route or non-machinable flat-sized presort and Labeling List:

- Carrier Route Simplified Addressed Saturation mailings (EDDM).
- Mailpieces that do not meet the deflection standards in 201.4.6.
- Flat-size pieces that do not meet any one of the minimum dimensions of an automation flat (either 5 inches high, or 6 inches long, or .009 inches thick).
- Any Bound Printed Matter or Periodicals flat-size mailpiece that exceeds 20 ounces in weight.

14.1.3 FSS Optional Presort

The following types of pieces may optionally be prepared in FSS scheme bundles:

- Mailings of In-County Periodicals flats and the associated Outside-County Periodicals flats mailings of 5,000 pieces or less may be prepared according to these standards in 14.0.
- USPS Marketing Mail and Periodicals Carrier Route Saturation mailings (other than EDM).

14.1.4 FSS Preparation

In addition to the applicable FSS scheme and facility presort, mailpieces and bundles must also be prepared as follows:

- a. Bundles for all FSS schemes must be identified as an FSS scheme presort with an optional endorsement line under 203.7.0, or when authorized, using a red Label 5 SCH barcoded pressure-sensitive bundle label.
- b. It is recommended that all pieces placed into an FSS scheme bundle be barcoded, and bear an accurate delivery point Intelligent Mail barcode with an accurate 11-digit routing code.
- c. All FSS scheme bundles must be prepared in bundles with a 3-inch minimum and a 6.5-inch maximum height. The following standards also apply:
 1. “Leveling” (adjusting bundle heights within an FSS Scheme to avoid overflow bundles) of the bundles within each scheme is encouraged.
 2. Bundles must be placed on or in sacks, trays, pallets, or alternate authorized containers to form layers of consistent thickness.
 3. Bundles of uneven thickness must be counter-stacked on pallets or approved alternate containers in accordance with 8.5.8.
 4. Except for one overflow bundle that may be under the minimum size, all bundles within each FSS scheme must be of uniform size.
- d. Pallets must be prepared under 8.0 and labeled under 8.6, with a pallet label bearing an Intelligent Mail container barcode as described in 204.3.4.
- e. An FSS scheme pallet, or approved alternate container, must be made when 250 pounds or more of bundles are available for an individual FSS scheme. Bundles remaining after palletization may be placed in sacks (or flat trays, if approved) or approved alternate container.
- f. FSS scheme bundles for multiple schemes processed at one facility according to Labeling List L006, column C, may be combined on an FSS facility pallet or approved alternate container if quantities are less than 250 pounds.
- g. Sacks and trays containing flat-size pieces prepared under FSS schemes must meet the applicable sacking standards in 14.2, 14.3, and 14.4, and be labeled with an Intelligent Mail tray or sack label under 204.3.0.

Effective July 16, 2020, the Postal Service™ is revising the International Country Listing for New Zealand in *Mailing Standards of the United States Postal Service*, International Mail Manual (IMM®) to add a prohibition on tobacco products.

The circular notes that the effective date of the prohibition is July 1, 2020, even though the effective date of the IMM revision is July 16, 2020 (the date of this *Postal Bulletin* article).

Invalid USPS Corporate Account Numbers

Provide this listing to Contract Postal Units and acceptance clerks in non-POS locations without intranet access to validate a USPS Corporate Account (USPSCA) number online. For all other locations, online USPSCA validation is preferred. This list supersedes all previous notices, which you must recycle.

Acceptance clerks must not accept Priority Mail Express® shipments bearing an invalid USPSCA number in the “Payment by Account” or “Agreement Number” section of the label or form.

Note: The first 6 digits of a 9-digit Custom Designed Service and Next Day Pickup Agreement make up the Corporate Account Number.

Verifying U.S. Postal Service Money Orders

Follow these steps to cash a Postal Service™ money order:

1. Check that the amount does not exceed the legal limit: \$1,000 for domestic, and \$700 for international Postal Service money orders.
2. Check that the proper security features are present:
 - When held to the light, a watermark of Benjamin Franklin is repeated from top to bottom on the left side.
 - When held to the light, a dark line (security thread) runs from top to bottom with the word “USPS” repeated.
 - When there is discoloration around the dollar amounts, this might indicate the amounts were changed.

These appear in Postal Service Notice 299, *U.S. Postal Money Order Reference Card*, or online at usps.com/shop/money-orders.htm.

3. If the money order seems suspicious, call the U.S. Postal Service Money Order Verification System at 866-459-7822.

Provide this information to local banks and retailers, as they also receive Postal Service money orders for cashing.

Other Information

Overseas Military/Diplomatic Mail

Mail addressed to military and diplomatic post offices overseas is subject to certain conditions or restrictions of mailing regarding content, preparation, and handling. The APO/FPO/DPO table outlines these conditions by APO/FPO/DPO ZIP Codes™ through the use of footnoted mailing restrictions codes (see the [Restrictions](#) page following the table).

Acceptance clerks must use the table with the Retail System Software terminal to determine which APO/FPO/DPO ZIP Codes are active and which conditions of mailing apply.

The entries under “Changes” appear in bold in the following APO/FPO/DPO table:

Changes

APO/FPO/DPO	Action	Effective Date	See Restrictions
APO AE 09378	Close	07/06/2020	
DPO AA 34033	Remove J	06/29/2020	B-C1-C2-F-F1-F3-I3-L-M-N-R-R1-T-V-Z-Z1

We have eliminated “Not Active” entries from the table below to save space and paper.

The following FAS Restrictions table outlines these conditions as listed by each affected FAS ZIP Code™ through the use of footnoted mailing restrictions codes (see the [Restrictions](#) following the table). Mailing and Shipping Services

Commercial Mailer Requirements for Providing Advance Electronic Data for International and Domestic Packages Leaving the U.S. Customs Territory

This notice highlights some of the requirements for commercial mailers to provide Advance Electronic Data (AED) on all domestic and international mail destined to locations outside the U.S. Customs Territory (19 CFR §101.1), including certain required data elements and the need to use a Shipping Services File (SSF).

Note: Packages destined for the U.S. Customs Territory may fall under these same requirements in cases where they are shipped from a United States origination point that is outside of the U.S. Customs Territory (and a Customs Form is required), such as Army Post Office/Fleet Post Office/Diplomatic Post Office (APO/FPO/DPO) destinations.

In addition to complying with any other requirements of U.S. law, any USPS® authorized postage providers, third-party vendors, and commercial mailers sending a domestic or international item that requires a customs form must follow these procedures:

1. **SSF.** Commercial mailers must transmit the required electronic customs data to USPS via a SSF, and follow existing documentation and system specifications found in Publication 199, *Intelligent Mail Package Barcode (IMpb) Implementation Guide for: Confirmation Services and Electronic Verification Systems (eVS) Mailers* (Pub 199), Ver. 21, 1-26-20 (see Pub 199 at postalpro.usps.com/node/782):

- a. The SSF structure and format can be found in Pub 199, Appendices B and C:
 - i. File Version 1.7: Appendix B (postalpro.usps.com/node/329).

- ii. File Version 2.0: Appendix C (postalpro.usps.com/node/330).

- b. The template for establishing and configuring a SSF Transmission Account can be viewed at postalpro.usps.com/node/889.

Note: SSF field names and meta-data tags, and the manner in which data elements are assembled and transmitted to USPS are defined in the links above. The mandatory elements described below are types of data that must be included for any item with a customs declaration consistent with U.S. export regulations.

2. **Mandatory AED elements.** The following elements are mandatory unless otherwise specified:

- a. Tracking Number(s): A unique tracking number must be provided for each item in the mailing (either IMpb® for Domestic or 13-character for International):
 - i. For International products, this is the 13-character customs form barcode conforming to the Universal Postal Union (UPU) Technical Standard S10 barcode with syntax: 2-letter prefix, 9 numbers, and a 2-letter suffix (suffix is US when sent from the U.S.).
 - ii. For Domestic products, this is the Intelligent Mail® package barcode (IMpb).
- b. Receptacle/Container Information (Required*): The receptacle number must be supplied for all con-

tainerized mailings (e.g., bagged and palletized). Enter the receptacle information in the Customer Reference ID field of the D1 section of the SSF.

**This information is optional only if the mailing is not containerized.*

c. Sender Information:

- i. Sender Name or Sender's Business Name: One or the other must be provided as described in Pub 199 at postalpro.usps.com/node/782.

Note: This is the U.S. Principal Party of Interest (USPPI), defined in U.S. Foreign Trade Regulations (FTR).

- ii. Sender Address: The complete street, city, state, ZIP Code™ (5-digit), and country code as described in Pub 199 at postalpro.usps.com/node/782.
- iii. Sender Phone Number may be required (Conditional): See *Mailing Standards of the United States Postal Service*, International Mail Manual (IMM®) and *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®) at blue.usps.gov/cpim/manuals.htm for country restrictions and product restrictions (e.g., Priority Mail Express® requires phone number of sender).

d. Recipient Information:

- i. Recipient Name or Recipient's Business Name: One or the other must be sent as described in Pub 199 at postalpro.usps.com/node/782.

Note: This is the End User, defined by the U.S. Bureau of Industry and Security.

- ii Recipient Address: The complete, correctly formatted delivery address of recipient.

- (1) International Addressing – a full and complete address is required. Some fields may require null values if the destination country does not use all address elements, such as the Post Code system (see Pub 199 for instructions at postalpro.usps.com/node/782):

- (a) Street Address or PO Box.
- (b) City.
- (c) State or Province (Conditional) – required where this governmental administrative division exists in destination addressing standards (mailer is responsible for correct address, in English, using the address format required by the destination country).

- (d) Delivery Post Code (Conditional) – required if destination country uses Post Code in addressing.

- (e) Delivery Country Code (Destination and Delivery country code) – defined by ISO 3166-1 (see iso.org/obp/ui/#search).

- (2) Domestic Addressing – a full and complete address is required. Some fields may require null values if the destination does not use all address elements, such as the Post Code system (see Pub 199 for instructions at postalpro.usps.com/node/782). For assistance with Military Addressing Standards, see about.usps.com/publications/pub640/pub640_tech.htm. For specifics regarding Domestic addressing for the Possessions, Territories, and Freely Associated States, see pe.usps.com/text/dmm300/608.htm. Domestic addresses must include:

- (a) Street Address or PO Box.
- (b) City.
- (c) State.
- (d) ZIP Code.
- (e) Country Code (US).

- e. Package Information (section of SSF which describes each individual package):

- i. Postage Paid: Mailers must complete fields in the SSF that reflect payment methods (see Pub 199 at postalpro.usps.com/node/782).

- ii. Other Data Elements that may also be Required for Export and Import Customs Clearance:

- (1) License field (Conditional) – requirements may apply depending upon U.S. export regulations or destination country import rules, transit laws, regulations, or policies. See destination country requirements at pe.usps.com/text/imm/ab_toc.htm.

- (2) Harmonized System code (Conditional) – requirements may apply depending upon U.S. export regulations, destination country import rules, transit laws, regulations, or policies. See destination requirements at pe.usps.com/text/imm/ab_toc.htm.

- (3) Automated Export System (AES) / Internal Transaction Number (ITN) Exemption – provide exemption or filing citation. See export requirements in Publication 699 at about.usps.com/publications/pub699.pdf.

- (a) If exempt from filing, mailer must indicate the appropriate No Electronic Export Information (NOEEI) citation.
 - (b) If not exempt, AES/ITN is required for export; mailer must provide the complete ITN.
- (4) Category of Goods – in the “Description of Package” field of the SSF, mailers must indicate all applicable categories of items in a package:
- (a) “1” = Merchandise.
 - (b) “2” = Gift.

 - (g) “7” = Humanitarian Donations.
 - (h) “8” = Dangerous Goods – this category must be selected when shipping any dangerous goods that are approved for mailing. For information about shipping and packing requirements, see Publication 52, *Hazardous, Restricted, and Perishable Mail* (pe.usps.com/cpim/ftp/pubs/Pub52/pub52.pdf) or the IMM (pe.usps.com).
- Note:** The “Content Comments” field of the SSF is Conditional. The mailer must provide further description of the contents when “6” = Other is selected.
- iii. Total Package Value: Total value of all items in an individual package.
- (1) Total Package Weight (Net): Weight in ounces or pounds of contents only; no more than 15 oz. may be entered in the ounces field. Weights over one pound may not be indicated only in ounces (e.g., 32 oz. must be entered as 2 pounds, 0 ounces).

 - (3) Customs Content description: Detailed description of each item (e.g., “men’s cotton shirts”). General descriptions, such as “samples,” “food,” or “toiletries” are not acceptable. Use of general descriptions may result in delays due to additional customs inspection or return to sender.

Note: See SSF specifications for information about which special characters are acceptable.

3. AED Transmission. To ensure receipt of required electronic data, the SSF must be transmitted to USPS *no less than two hours before* presenting a shipment for induction at a USPS facility. Mailings that fail to meet AED transmission requirements may be subject to refusal.

Note: The above requirements apply to:

- a. International mail pieces requiring a Customs Form.
- b. Domestic mail destined to a location outside of the U.S. Customs Territory (see DMM 608.2.1 and 608.2.2), including:
 - i. Overseas APO/FPO/DPO destinations.
 - ii. The United Nations, NY, U.S. territories and possessions, and, Freely Associated States.
 - iii. Items destined for the U.S. Customs Territory may fall under these same requirements in cases where they are shipped from a United States origination point that is outside of the U.S. Customs Territory (and a Customs Form is required), such as APO/FPO/DPO destinations.

Whom does this policy affect?

This notice clarifies certain elements that must be provided by USPS authorized postage providers, third-party vendors, and commercial mailers, and clarifies that the SSF must be used to satisfy AED procedures.

How does this impact Commercial Mailers?

Effective January 1, 2021, USPS must collect 100 percent AED for any item with goods (international or domestic) that is mailed from the U.S. Customs Territory per the *Synthetics Trafficking and Overdose Prevention Act (STOP Act)*, 2018. Mailings that fail to meet AED requirements may be subject to refusal.

This notice is intended to clarify certain data elements required for AED compliance, and clarifies that the SSF must be required in communication of said mandatory data. It does not necessarily provide a comprehensive list of data that must be provided to the Postal Service for each mailing. Mailers must also consult existing requirements in the IMM and DMM (see pe.usps.com/), and Pub 199 (see postal-pro.usps.com/node/782), which offer further guidance as to which data elements commercial mailers must provide.

Note: Items destined for the U.S. Customs Territory may fall under these same requirements in cases where they are shipped from a United States origination point, which is outside of the U.S. Customs Territory (and a Customs Form is required), such as APO/FPO/DPO destinations.

Does this notice impact USPS Retail Customers?

No, this notice specifically pertains to commercial mailers who use the SSF to transmit AED. USPS retail facilities, approved Contract Postal Units, and other commercial agents and partners authorized to accept international and domestic packages use systems to fulfill the AED requirements. However, many of the data elements required are the same, and retail mailers must also review and comply with all applicable laws.

Are there other laws or regulations, besides the STOP Act, that govern which data elements are mandatory or conditional (e.g., license field)?

Yes. Mailers are responsible for complying with all applicable laws, regardless of whether or how they are outlined in this notice. For example, shipments sent from the United States and its possessions or territories are subject to federal export laws and regulations that may require approval for, or that may otherwise restrict, what can be sent to certain countries, individuals, and entities. These regulations are designed to protect U.S. national security, foreign policy, and economic interests. Failure to comply with these federal regulations can result in civil and criminal penalties.

Primarily, there are three U.S. Government agencies that may require your shipment to have an export license:

- Department of Commerce, Bureau of Industry and Security (BIS).
- Department of Treasury, Office of Foreign Assets Control (OFAC).
- Department of State (State Department).

For more information about non-Postal Service export regulations, see IMM, Chapter 5 (pe.usps.gov/text/imm/immc5_001.htm) and Publication 699, *Special Requirements for Shipping Internationally* (about.usps.com/publications/pub699.pdf). In addition, new federal laws will be promulgated in the future, including new federal regulations issued by U.S. Customs and Border Protection, and mailers will be required to comply with all such applicable regulations at the time of mailing.

Destination countries further define which items are prohibited or restricted, and provide additional guidelines regarding import documentation (e.g., commercial invoices and import permits) and data elements. A mailer must consult the Individual Country Listings in the IMM for country-specific prohibitions and restrictions (see pe.usps.com/text/imm/ab_toc.htm). Other information, even if not required by law, may be requested to help facilitate the delivery of items, such as recipient phone numbers and email addresses for certain countries and certain products.

What is the U.S. Customs Territory?

According to the Code of Federal Regulations, Title 19 — Customs Duties, Volume 1, 2008-04-01, Section §101.1 – Definitions, “Customs territory of the United States” includes only the States, the District of Columbia, and Puerto Rico.”

USPS works with the U.S. Customs and Border Protection to ensure that any items sent beyond the defined territory adhere to requirements for data and documentation.

The first-day-of-issue postmarks appear in this issue on page [47](#), and the special dedication postmarks are shown here.

Special Dedication Postmarks

Only the following pictorial postmark is permitted for *Bugs Bunny* stamps. The word “Station” or the abbreviation “STA” is required somewhere in the design, because it will be a temporary station. Use of any image other than the following special pictorial image is prohibited.

Guidelines for Finalizing the Bugs Bunny Stamps Pictorial Postmark Art

To finalize the *Bugs Bunny* stamps pictorial postmark art, insert the date, city, state, and ZIP Code™ of the physical location of your event adjacent to the stamp image. Overall dimensions of the pictorial postmark must not exceed 4 inches (horizontally) by 2 inches (vertically). Collectors prefer the dimensions 3-1/2 inches by 1 inch.

The Postal Service™ must make all special postmarks known to collectors through advance publicity in the *Postal Bulletin*. Therefore, all special dedication cancellations must be reported to Stamp Services 4 weeks before the event using PS Form 413, Pictorial Postmark Announcement/Report. To get a copy of the form, go to blue.usps.gov/formmgmt/forms/ps413.pdf.

The *Bugs Bunny* stamps will be revealed in a future edition of the *Postal Bulletin*.

How to Order the First-Day-of-Issue Digital Color or Traditional Postmarks

Customers have 120 days to obtain the first-day-of-issue postmarks by mail. Each cover must have sufficient postage to meet First-Class Mail® requirements. Customers may purchase new stamps at their local Post Office™, by phone at 800-782-6724, or on The Postal Store® website at usps.com/shop.

Digital Color Postmarks

Only select stamp issues offer a digital color postmark. Customers may submit #6 or #10 envelopes constructed of paper rated as "laser safe." The Postal Service™ recommends envelopes of 80-pound Accent Opaque, acid-free, 9/16-inch side seams with no glue on the flap. The maximum size of all digital color postmarks is 2 inches (vertically) by 4 inches (horizontally). Allow sufficient space on the envelope to accommodate the postmark. Do not use self-adhesive labels for addresses on the envelope. Two test envelopes must be included. There is a minimum of 10 envelopes at 50 cents per postmark required at the time of servicing. Customers must submit a check, money order, or credit card for payment.

The Postal Service reserves the right to not accept hand-painted and other cachet envelopes that are not compatible with our digital color postmark equipment. The Postal Service also reserves the right to substitute traditional black rubber postmarks if use of nonspecified envelopes results in poor image quality or damage to equipment.

Customers must affix the stamps to the envelopes and address them to themselves or others for return through the mail. Or, they may include an additional self-addressed return envelope, large enough to accommodate their canceled items, with sufficient postage affixed for return of

their postmarked items. Address customer requests for digital color postmarks to:
